PROJECTS

## • Inspiration for creating an Adventure Park

### Objective of this presentation:

- To inspire, sketch, map and budget the possibilities regarding adventure experiences.
- This in order to discuss a budget and plan of approach.
- This concept is a guideline and a source of inspiration for all those who want to create an adventure park.
- The sustainability of the product and the amount of maintenance required will also be taken into account.

### Possible Contents

#### A. Adventure Activities, sports activities without lifelines and/or climbing protection in open air

1. Floating High rope park
2. Bike Park with sustainable obstacles.
3. Bouldering climbing rocks 3 m high with sand or fine loose gravel as fall arrestor
4. Low rope park, teambuildingpark
5. Low kids adventureropes
6. Obstacle runs
7. Sport and fitness tracks through the park for the fitness guru
8. Artificial caving
9. Nets park with high ropes
10. Kids Nets park with play & funelementments
11. 3D Labyrinth / 3D Maze with exits to find, to experience several attractions.

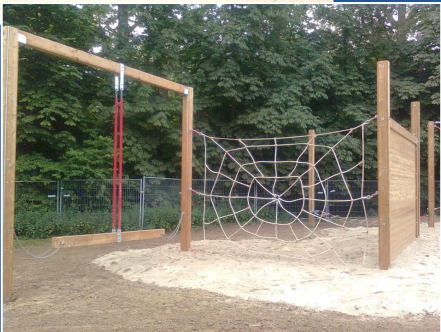

- **Inspiration for creating an adventure park**

- B. Outdoor activities with lifelines and/or climbing safety devices in open air
  1. High rope adventure with 4 floors and the difficulty levels kids, green, blue, red and black
  2. Standard climbing wall on climbing grips
  3. Quick jump
  4. Quick jump zip
  5. Straight multiple Ziplines
  6. Kidsziptrack
  7. Zip with turns
  8. Outdoor Funclimbing paradise
  9. Via Ferrata on boulderingrocks
  
- C. Indoor activities with lifelines and/or climbing safety.
  1. Standing or suspended High rope adventure with 3/4 floors and the difficulty levels kids, green, blue, red and black.
  2. An indoor multiple zipparadise, cruising on a zipwire through a building, light effects and dreamy music create a mystical atmosphere.
  3. All activities which can be built outside, can be created inside, even a suspending high rope park above a tropical swimming pool.

## • Activities without lifelines and/or climbing protection in open air

1. Floating High rope park
2. Bike Park with sustainable obstacles.
3. Bouldering climbing rocks 3 m high with sand or fine loose gravel as fall arrestor
4. Low rope park, teambuildingpark

## • Floating High Rope Park

The structure is built to be used without a safety line in Spring, Summer and Fall. Only lifejacket, helmet and wetsuit for water below 18°C.

The structure is also built to be used with a safety line Double function on the same construction.

When winter kills your fingers and it's not pleasant to fall into the water, the continuous belay system keeps you safe and secure when falling.

Inspiration  
A9

- **Netpark with High Ropes**

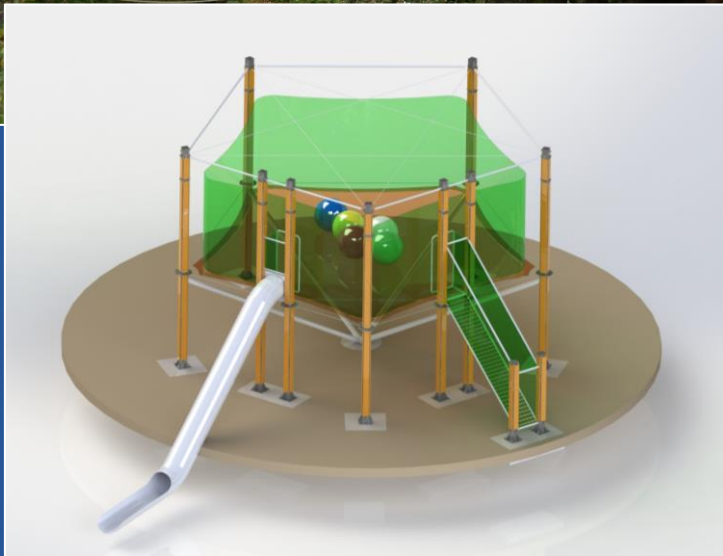

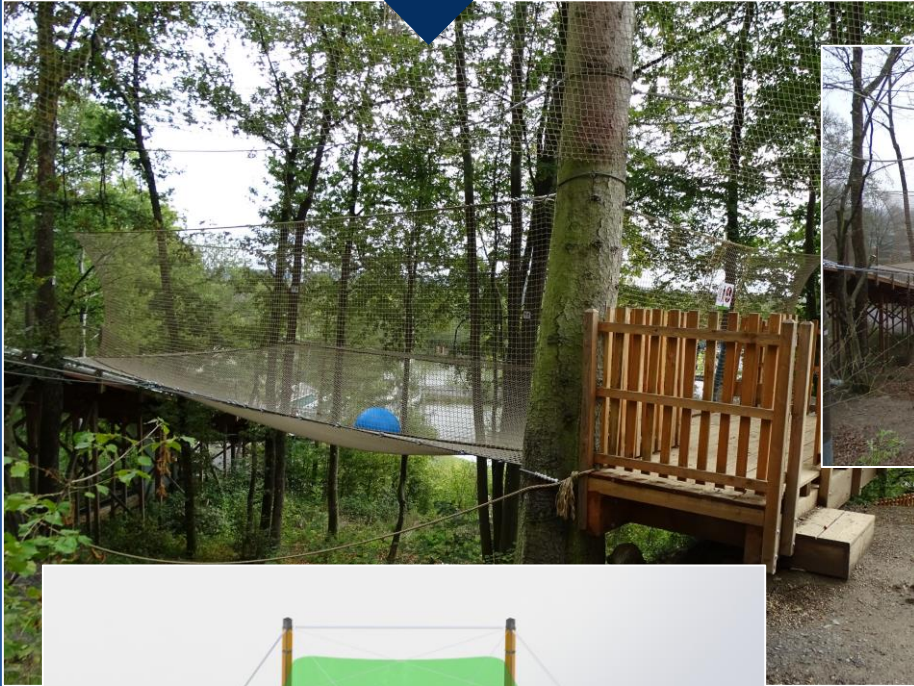

Double layer of netting, under tension, for fall arrest. This activity requires maintenance. It is necessary to tighten the nets regularly. The lifespan of the nets is limited. Nets are often used for playing in despite the fact that it is a high rope course.

To have an attraction which is sustainable, the high rope track and the nets, has to be built between artificial steel poles.

Inspiration  
A10

- **Jump and fun net park with playelements**

Triple layer of nets, under tension, for jumping and playing.  
Accessible for multiple persons.  
This activity has a high fun level  
The disadvantage of this activity is the high cost of maintenance, as the nets have to be stretched regularly.  
The lifespan of the nets is limited.

Inspiration  
B1

- **High Rope Park - 3/4 levels - difficulty levels kids, green, blue, red and black**

The high Rope Adventure park can be the top adventure activity of your parc.

The structure can be built-up with 3 or 4 levels. With 4 levels, you probably need a fencing around the structure. The tracks can have different levels of difficulty. The structure is sustainable, it is an investment which lasts for ever. The continuous belay system in the track is a system, which requires less personal. You do not need permanent supervision. Only some good instructions are needed for exploitation.

MAKING OUR **GLOBE**

INTO ONE **BIG ATTRACTION**

Inspiration  
B1

- **High Rope Park - 3/4 levels - difficulty levels kids, green, blue, red and black**

Possible content on 4<sup>th</sup> floor  
as example for all floors

- 2 short entry and exit obstacles, **orange arrow**
- 12 basic obstacles in non stop track, **red arrow**
- 4 bifurcations with additional short cuts in the basic track with supplementary obstacles, **purple arrow**
- 6 extra special obstacles in an 9 obstacle non stop track, **white arrow**

- 3 or 4 levels in the structure.
- Depending on the rules in the country, a fencing must be built around the hirope structure if it has an accessible lower ground level for kids.
- If the structure is built as shown on the picture, you can have several tracks on each level (floor).
- Ground floor can be a kids rope course and a kids zip track.
- Second floor is the green level,
- Third floor is the Blue level,
- Fourth floor is the Red/Black Level.
- In all levels, you can have bifurcations to other tracks on the same floor.
- You can start with a minimum number of obstacles in the track and add more after some time.
- Example in picture of fourth floor.
- The white arrows can be a black difficult track.

## • Via ferrata on bouldering rocks

- Artificial rocks, in concrete with additional climbing grips and stainless steel supports.
- Sea sand or very fine gravel serves as fall arrest.
- A via ferrata is built on the rocks and on any neighbouring buildings or structures.
- A cable is used as a lifeline, like in the mountains

- **Indoor High ropes on posts**

When weather is too rainy, or outside the temperature is too high, or darkness has fallen outside, you still can have some adventure activity inside

The structure can be built in posts, with 2, 3 or 4 levels depending on the height of the building.

Combining high rope obstacles and zip wires, creates a lot of fun inside.
